NAZAR KHLIVNYI

Fullstack Developer

Poland • nazarhlivnij@gmail.com • +48 731-180-523 • LinkedIn • GitHub • Personal Web Page

SUMMARY

Full-stack developer with core stack of **Java Spring Boot and React**, as well as experience in **C# .NET Core (internship)**. Developed secure JWT authentication and real-time features for SaaS platforms, integrated AI (Ollama for code analysis) to improve user experience. Passion for clean code and teamwork in an Agile environment, supported by personal projects and internships.

TECHNICAL SKILLS

Frontend: React, Next.js, Angular, Redux, Tailwind CSS
Backend: Java Spring Boot, C# .NET Core, Node.js, REST API, GraphQL
Databases: PostgreSQL, MySQL, Microsoft SQL Server
DevOps & Cloud: Docker, GitHub Actions (CI/CD), AWS, Vercel
Collaboration & Tools: Git/GitHub, Postman, Figma, Agile/Scrum, Jira
Testing & Security: Unit testing, JWT authentication
AI Integration: OpenAI API (basic), Ollama, Prompt Engineering

PROFESSIONAL EXPERIENCE

Full-Stack Developer | NoteFlow — Mar - Sept 2025

Enterprise ERP platform for business process management

- Developed secure authentication system with JWT and RBAC, enhancing platform security
- Integrated analytics microservice + caching layer, improving data access by 30%
- Created real-time progress tracking, boosting user engagement
- Implemented Redux state management to better handle large datasets and app state
- Worked on Document Management System (DMS) features to streamline content handling

Tech Stack: React (Next.js), TypeScript, Redux, Axios, Java Spring Boot, MySQL, AWS, Docker

Full-stack Developer | Sprinter IT Sp. z o.o. (University Internship) — Aug - Sept 2024

- Created an admin module for bulk user operations, streamlining workflows
- Integrated logging and audit systems to improve platform reliability and operational transparency

Tech Stack: React.js, Axios, C# .NET Core, Microsoft SQL Server

Full-Stack Developer | FitTy — Jan - Jun 2024

Workout management system

- Developed drag-and-drop workout planner, improving user experience and training plan creation
- Created real-time tracking and progress visualization, helping users monitor workouts
- Implemented secure data handling and optimized database queries
- Optimized component performance, reducing load times and improving overall app responsiveness

Tech Stack: Java Spring Boot, PostgreSQL, React.js, Axios, TypeScript, Tailwind CSS

PERSONAL PROJECTS

- **AI Code Review Platform** — web app for reviewing code with AI assistance React/Node.js • GitHub
- **Typing Speed Teste**r — real-time typing analytics, React, Tailwind CSS • GitHub

EDUCATION & CERTIFICATIONS

- BSc in Computer Science — Opole University 2022 - 2026
- Full-Stack Engineer – Codecademy 2024
- Java Full Stack Spring Boot and Angular – Udemy 2023
